Early R forecasting (c.2000)

ts package (now stats package):

- Holtwinters(): point forecasts only, with optional multiplicative seasonality (written by David Meyer).
- arima(): state space formulation of ARIMA models (written by Brian Ripley).
- structTS(): Basic structural models as per Harvey (written by Brian Ripley).

Early R forecasting (c.2000)

ts package (now stats package):

- Holtwinters(): point forecasts only, with optional multiplicative seasonality (written by David Meyer).
- arima(): state space formulation of ARIMA models (written by Brian Ripley).
- structTS(): Basic structural models as per Harvey (written by Brian Ripley).
- Each had a predict() method, but output was inconsistent.
- Holtwinters did not produce prediction intervals.

forecast package for R: motivation

- Consistent output for existing methods by introducing new S3 generic forecast() and new S3 class forecast.
- New methods including ets(), thetaf(), auto.arima().
- Modelling functions can be swapped while leaving code unchanged.
- Easy plotting tools with new plot.forecast() method.
- New forecasting tools such as accuracy() calculations.

forecast package for R: history

Date	Event
Pre 2003	Collection of functions used for consulting projects
July/August 2003	ets() and thetaf() added
August 2006	v1.0 available on CRAN
May 2007	auto.arima() added
July 2008	JSS paper (Hyndman & Khandakar)
September 2009	v2.0. Unbundled from Mcomp, fma & expsmooth
May 2010	arfima() added
Feb/March 2011	<pre>tslm(), stlf(), naive(), snaive() added</pre>
August 2011	v3.0 . Box Cox transformations added
December 2011	tbats() added

forecast package for R: history

Date	Event
April 2012	Package moved to github
November 2012	v4.0. nnetar() added
June 2013	Major speed-up of ets()
January 2014	v5.0. tsoutliers() and tsclean() added
May 2015	v6.0 . Added several new plots
February 2016	v7.0 . Added ggplot2 graphics & bias adjustment
March 2017	<pre>v8.0. Added tsCV() & baggedETS()</pre>
April 2018	v8.3 . Added mstl(), and revised auto.arima()
April 2025	v8.24 . Last update

forecast package for R

- auto.arima + forecast
- ets + forecast
- tbats + forecast
- bats + forecast
- arfima + forecast
- nnetar + forecast
- stlm + forecast
- meanf
- rwf, naive
- thetaf
- dshw, hw, holt, ses
- splinef
- croston

All produce an object of class forecast

forecast package for R

- auto.arima + forecast
- ets + forecast
- tbats + forecast
- bats + forecast
- arfima + forecast
- nnetar + forecast
- stlm + forecast
- meanf
- rwf, naive
- thetaf
- dshw, hw, holt, ses
- splinef
- croston

All produce an object of class forecast

v9.0 will have new model functions:

- mean_model()
- rw_model()
- theta_model()
- spline_model()
- croston_model

CRAN Task View Time Series

CRAN Task View: Time Series Analysis

Maintainer: Rob J Hyndman, Rebecca Killick
Contact: Rob.Hyndman at monash.edu

Version: 2025-05-17

URL: https://CRAN.R-project.org/view=TimeSeries

Source: https://github.com/cran-task-views/TimeSeries/

Contributions: Suggestions and improvements for this task view are very welcome and can

be made through issues or pull requests on GitHub or via e-mail to the maintainer address. For further details see the Contributing guide.

Citation: Rob J Hyndman, Rebecca Killick (2025). CRAN Task View: Time Series Analysis.

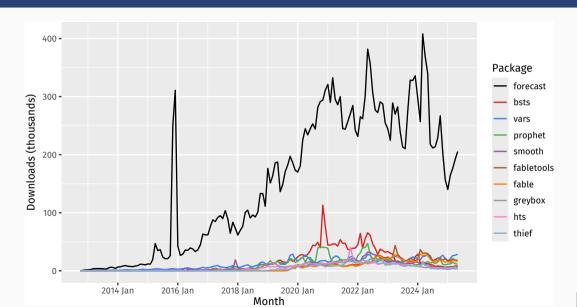

Version 2025-05-17. URL https://CRAN.R-project.org/view=TimeSeries.

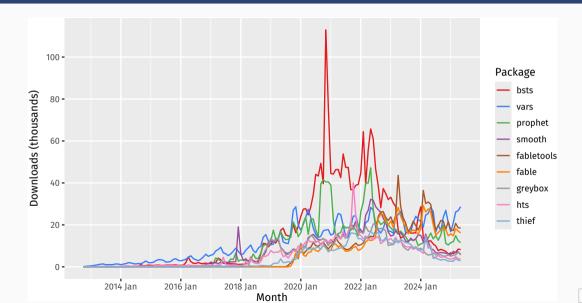

Installation: The packages from this task view can be installed automatically using the $\underline{\mathsf{ctv}}$

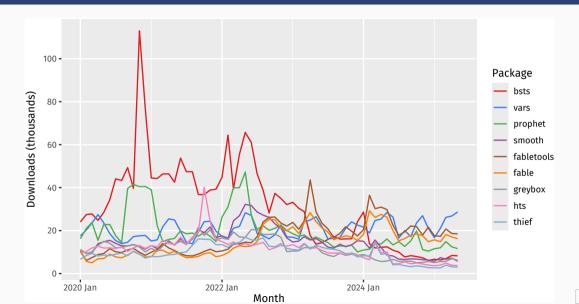

package. For example, ctv::install.views("TimeSeries", coreOnly = TRUE) installs all the core packages or ctv::update.views("TimeSeries") installs all packages that are not yet installed and up-to-date. See the CRAN Task View

Python packages with statistical models

statsmodels (2016-2024)

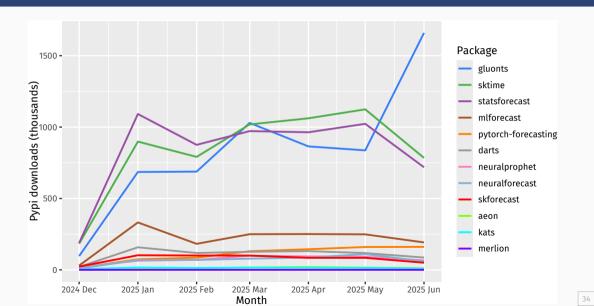

(Release dates)

- pmdarima (2017-2023)
- sktime (2019–2025) includes wrapper to pmdarima and to some StatsForecast functions
- GluonTS (AWS, 2019–2025) via wrapper to R forecast package
- Darts (2020–2025) some wrappers to StatsForecast
- Merlion (Salesforce, 2021–2023)
- StatsForecast (Nixtla 2022–2025)
- aeon (2023–2025) fork of sktime

Pypi downloads

Pypi downloads

Most complete packages

statsmodels

- ARIMA (not automated)
- ETS (not automated)
- MSTL
- Theta
- Regime switching
- ARDL
- ECM
- VARMA

sktime

- AutoARIMA
- AutoETS
- BATS/TBATS
- Theta
- STLForecaster
- Croston
- Bagged-ETS
- Prophet

StatsForecast

- AutoARIMA
- AutoETS
- AutoTBATS
- Theta
- MSTL
- Croston
- TSB, ADIDA
- ARCH/GARCH

Python packages with ML methods

- aeon (2023–2025) fork of sktime
- Darts (2020-2025)
- GluonTS (AWS, 2019–2025)
- Kats (2021–2022)
- Merlion (Salesforce, 2021-2023)
- MLforecast (Nixtla 2022–2025)
- NeuralForecast (Nixtla 2022-2025)
- NeuralProphet (2020-2024)
- pytorch-forecasting (2020-2025)
- skforecast (2021–2025)
- sktime (2019-2025)

(Release dates)

ML forecasting methods available in GluonTS

- Deep Renewal Processes
- DeepAR
- DeepFactor
- DeepNPTS
- DeepState
- DeepTPP
- DeepVAR
- DeepVARHierarchical
- GPForecaster
- GPVAR
- LSTNet

- MQ-CNN
- MQ-RNN
- MQF2
- N-BEATS
- Rotbaum
- SimpleFeedForward
- Temporal Fusion
- Transformer

 Transformer
- WaveNet

Forecasting methods available in NeuralForecast

- Autoformer LSTM TCN BiTCN MLPTFT DeepAR MLPMultivariate TiDE
 - DeepNPTS **NBEATS**
 - DilatedRNN **NBEATS**×
 - FEDformer NHITS
 - GRU
 - HINT

Informer

KAN

iTransformer

- PatchTST
- - NLinear

RNN

SOFTSa

StemGNN

- **TSMixer**
- TimesNet
- TimeLLM

TSMixerx

- TimeMixer

VanillaTransformer

Julia

- colintbowers/RARIMA.jl: 2015-2018. Wrapper for R packages stats and forecast. No longer working
- josemanuel22/DeepAR.jl: 2024-2025. DeepAR models.
- LAMPSPUC/Sarimax.jl: 2024-2025. SARIMA using JuMP.
- LAMPSPUC/ScoreDrivenModels.jl: 2020-2022. Generalized AR score models.
- LAMPSPUC/StateSpaceModels.jl: 2018-2025. Based on Durbin & Koopman (2012).
- viraltux/Forecast.jl: 2020–2021. Descriptive stats and plots, but only AR forecasting.
